

Yecho

Know Your Yield

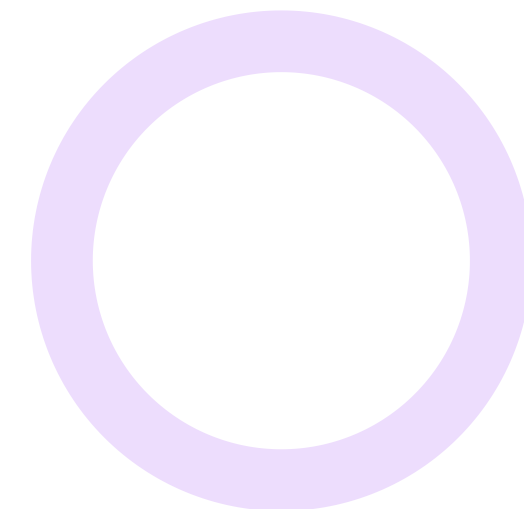

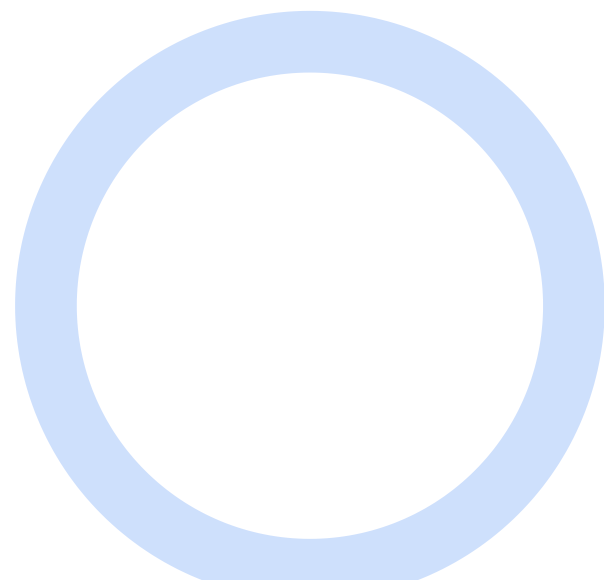

You use DeFi? Cool.

But how much did you earn yesterday on Aave?

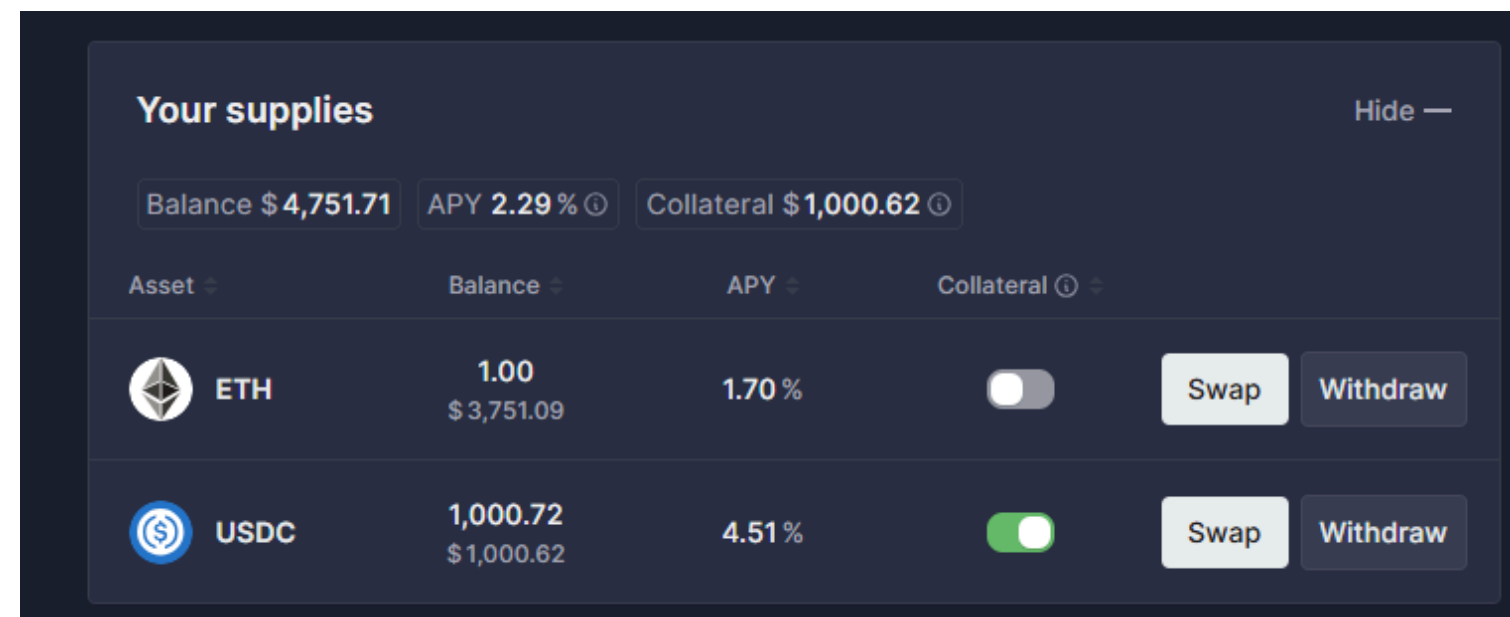

Correct answer: You don't know

DeFi is powerful but fragmented.

- No unified view of your earnings
- No historical tracking

Your supplies Hide —

Balance \$4,751.71 APY 2.29 % ⓘ Collateral \$1,000.62 ⓘ

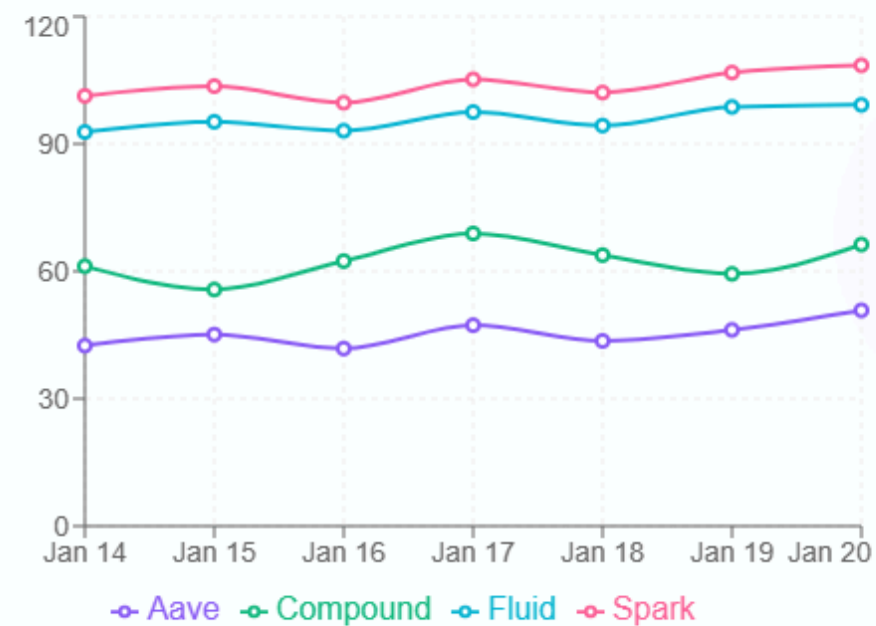

| Asset | Balance | APY | Collateral ⓘ | | |
|--|------------------------|--------|-------------------------------------|------|----------|
|  ETH | 1.00 \$3,751.09 | 1.70 % | <input type="checkbox"/> | Swap | Withdraw |
|  USDC | 1,000.72 \$1,000.62 | 4.51 % | <input checked="" type="checkbox"/> | Swap | Withdraw |

Meet Yecho

Monitor your DeFi earnings, day by day

Yield Performance

Daily yield rates across protocols

Last Income

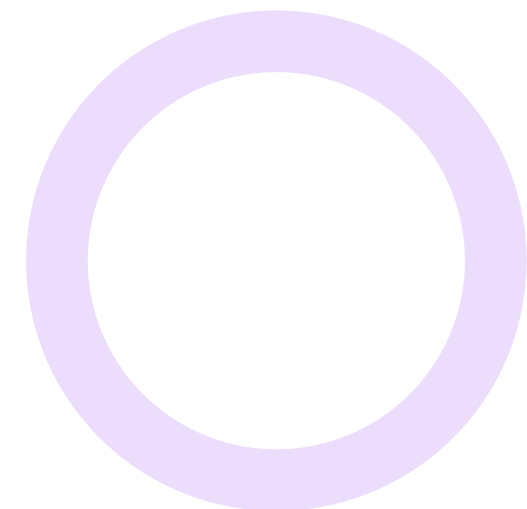

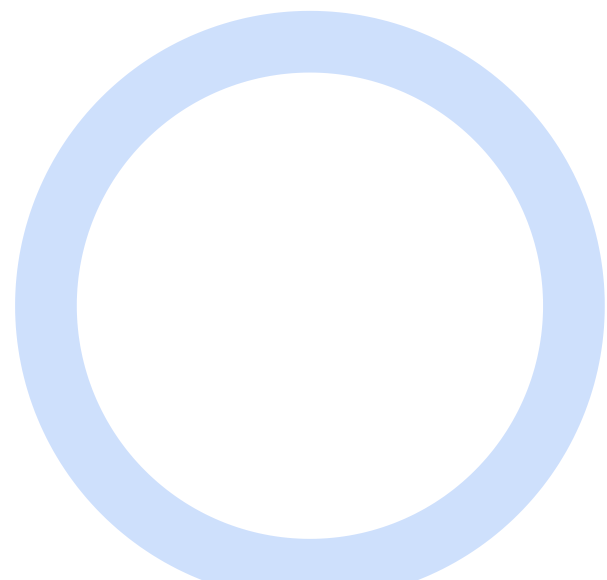

Recent income received from protocols

What Yecho Does

- **Daily Yield Snapshots**
- **Works across protocols**
- **Supports multiple blockchains**
- **Doesn't require main wallet connection**
- **Stores your history privately**

Daily PnL that makes sense.

Your earnings, broken down per token and protocol.

Tracked on Yecho

Real Yield. Real Data.

Real yield is the new meta.

But no one tracks it right.

Where We're Headed

- **More protocols, blockchains**
- **Open API access for teams & treasuries**
- **Subscription or grant-backed model**
- **Potential open-sourcing of core logic**

**We're building the analytics layer DeFi
deserves.**

**If you use DeFi and care about what you earn
Yecho is for you**
